Dries Visser Pure-Bred Game presents a carefully selected group of elite young Kudu cows, backed by nearly 30 years of dedicated breeding and selection across four established herds – ensuring both genetic diversity and a consistent, proven type.

These cows are rooted in strong, influential bloodlines, with key impact from renowned bulls such as Spiral, Hercules, Apollo, Mr. Curls, Shannana etc – each contributing to the structure, horn quality, and overall balance seen in this offering.

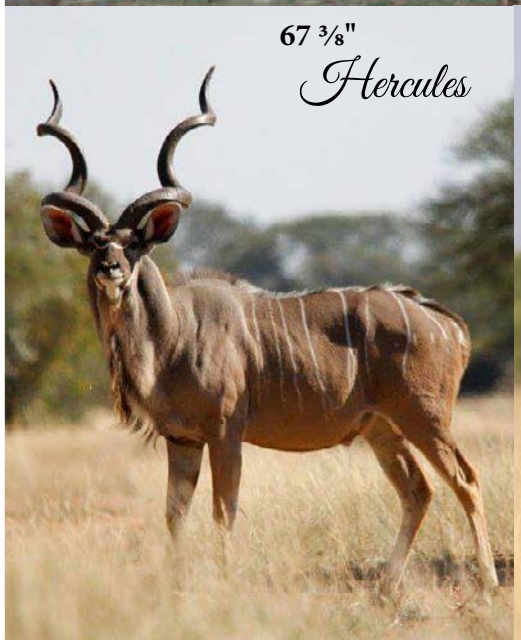

The genetics of the well-known 76 ⅞" Kudu bull Mr. Wow were introduced later, in 2018, when three of his heifers were added to the breeding program – further complementing an already solid and established foundation.

Coming from reliable maternal lines, these cows are currently running with 60"+ bulls, along with access to young sires showing 67"+ potential, ensuring continued genetic advancement and long-term breeding value.

ELITE PURE ZAMBIAN SABLE GENETICS 57"+ HERD SIRE QUALITY

This exceptional Pure Zambian Sable bull represents the very best of elite breeding – combining power, balance, horn quality, and a deeply proven genetic foundation. A true herd sire in every sense, built on generations of consistent excellence.

He is sired by the 49 ⅝" Mumba (half-brother to the 57 ⅝" Dries), with the legendary 49 ⅝"+ Big Boy Snr as grandsire. The sire line is further strengthened by a powerful 34"+ Tag B75 dam line, linked to the Kalala family and multiple full siblings producing 50"+ bulls as well as consistent 34"–36"females – confirming depth, fertility, and repeatable quality.

On the dam side, he is out of the 36"Delilah, again reinforced by Big Boy Snr influence, with additional strong maternal foundation coming through the proven B76 line – a cornerstone female family responsible for producing influential bulls such as 51"+ Mulobezi, Dries (57 ⅝"), Simamba (52"+), and Big Boy Jnr (50 ⅝"), alongside consistent high-quality daughters.

This bull measures a massive 57 ⅜" (worked down to 57"), carrying exceptional mass, 10 ⅛"bases, and a 20"tip-to-tip spread. He displays true herd sire presence, balance, and horn density – everything demanded from a top-tier breeding bull.

More importantly, he is already proving himself through his offspring, stamping his calves with the same balance, growth, and horn quality that define his own structure. For a serious Sable breeder, this is the kind of bull that sets a herd apart for generations.

What more can a dedicated Sable breeder ask for than a bull of this calibre? Securing genetics like this requires going far and wide – because animals of this consistency, power, and proven production are rarely found in one package.

A powerful foundation sire with exceptional genetics, outstanding horn structure, and the ability to consistently transmit quality – a true cornerstone bull for any elite Pure Zambian Sable program.

OTHER INFO - Griffin – Exceptional Buffalo Genetics from Dries Visser Pure Bred

Introducing Griffin – a truly outstanding buffalo bull bred at Dries Visser Pure Bred Game, carrying exceptional genetics that speak for themselves. From the very beginning, Dries Visser believed that there is no true genetic limitation between the various buffalo bloodlines. His philosophy has always been that the strongest and most successful buffalo breeding programs are built by combining the best of all bloodlines – drawing from Thaba Tholo, Addo, East Africa, Kruger, and others. This open-minded, results-driven approach forms the foundation of our buffalo breeding success today.For many years, there was a widespread mis-perception – an untruth that was repeatedly told – that the Kruger bloodline was more prone to sickness, while East African bloodlines were regarded as inherently stronger. Through years of practical experience and proven results, this narrative has been shown to be false. When managed and integrated correctly, each bloodline contributes its own valuable strengths, playing a vital role in building resilient, high-performing buffalo.With an impressive SCI of 137"and a remarkable RW of 150 ⅛", Griffin stands as a powerful example of selective breeding at its finest. Sired by the proven 46 ⅝"Lupande, and out of a dam line that traces back to strong, consistent performers – 37 ⅞" Tag 13 on the sire's dam side and a 33" dam, with further depth through 46 ⅞"Jumbo and 36 ⅝" Tag 12 on the maternal side. Griffin is the result of generations of carefully built genetics, combining strength, structure, and true breeding value. A bull that not only reflects the standard of Dries Visser Pure Bred Game, but also embodies the vision of balanced, integrated bloodline breeding that continues to deliver exceptional results.
